Re.Source is here to make your journey through sustainable packaging simple and impactful with a comprehensive collection of Earth-kind food and drink

packaging items. Whether you're focusing on waste reduction, recycling, composting, or another environmental goal, we work hard to help you bring your vision to

life. We are continually educating ourselves, shifting with new information, and sharing our latest knowledge with you so we can do better for the planet together.

## PRODUCT DESIGN INTENT

- 1 Multi-lingual direction speaks to the global impact of sustainability.
- 2 Repeating action clearly calls out and communicates what to do when you are done with the item. Simplifies what can be a confusing space.
- 3 Bold colors to target Millennial and Gen Z consumers - the customers who care the most about sustainability. The colors also stand out in a crowded space of muted greens and browns.
- 4 Content blocks communicates the beginning of life action and disclaimers on recycling and composting facility access.

## HOW DOES THIS HELP SOLVE A NEED FOR CUSTOMERS?

- Shows consumers that operators care about the environment and ties a positive impression to the business
- Communicates this message directly to their consumers
- Creates operational efficiency & minimal waste sorting

Made using renewable resources with the entire product life cycle in mind, our consciously crafted food and drink packaging aims to keep excess plastic and waste materials out of landfills.
